"At last . . . dependable
POWER FROM
RURAL LINES
for more profitable
Farm Operations!"

**That's What Farmers
All Over The Country
Are Saying About The**

H-A-S*

**PHASE CONVERSION
SYSTEM..**

★

This revolutionary development (covered by U. S. Patent No. 2,922,942), operates efficient 3 phase motors on rural single phase power.

A product of KEN ELLIOTT MOTORS, INC.

Farmers Have Discovered This About The H-A-S Phase Conversion System:

MORE POWER . . .

1. Delivers 100% of name plate rating of the motor.
2. Torque and efficiency are essentially the same as with 3 phase current (up to and including full load).

MORE VERSATILITY . . .

1. Special models available for multi-speed motors, reversing duty, long starting duty and others.
2. Adjusts itself to varying load conditions; no balancing or adjustment of taps, links or wires is required.
3. Will operate your Feed Grinders, Air Compressors, Blowers, Pumps, Feed Mixers, Augers, Conveyors, Silo Unloaders and many other applications.

LESS MAINTENANCE . . .

Three phase motors are the most trouble-free and dependable motors in use today. The H-A-S eliminates brushes, centrifugal switches and governors, etc.

ONE YEAR WARRANTY

MORE ECONOMY . . .

1. Electric motor repair costs are eliminated or reduced.
2. Three phase efficiency for single phase rates — a perpetual economy.
3. High Power Factor is helpful to your Power Company.
4. Tractors and costly engines may be replaced with efficient electric motors.

Here is one of the outstanding bulls we have ever raised. He is out of a 1st calf heifer and had the misfortune of being born in one of the few rain storms we had in 1959 and had a tough time his first 4 months. An outstanding son of the twice Int'l. Grand Champion Homeplace Eileenmere 999-35th. If you need a bull to put style smoothness and breed characteristics into your herd, give this fellow serious consideration.
